

PLAYCONNECT

Sports Community & Tournament Platform

PROJECT REPORT

A modern web platform for discovering players, organizing matches, joining tournaments, and tracking sports performance.

Student Name	Hasti S. Gor
University	Krantiguru Shyamji Krishna Varma Kutch University
Project Type	Web Development Project
Technologies	HTML, CSS, JavaScript, Font Awesome, Google Fonts

Academic Project Report • 2026

CERTIFICATE

This is to certify that **Hasti S. Gor** has successfully completed the project titled “**PlayConnect – Sports Community & Tournament Platform**” as an academic web development project. The project demonstrates the design and implementation of a responsive sports community website using modern front-end technologies.

DECLARATION

I hereby declare that the project report titled “**PlayConnect – Sports Community & Tournament Platform**” is prepared for academic purposes and represents my work in designing and developing the project interface, modules, content structure, and front-end implementation.

ACKNOWLEDGEMENT

I sincerely thank my university, faculty members, and everyone who supported me during the development of this project. This project helped me understand practical web design, responsive layouts, navigation structures, reusable UI components, and JavaScript-based interaction.

1. ABSTRACT

PlayConnect is a sports-focused web platform designed to connect sports enthusiasts with players, matches, tournaments, and community activities. The website provides an engaging interface where users can explore sports, discover players, create matches, view match information, check leaderboard rankings, and explore tournaments.

The project focuses on a clean, responsive, and user-friendly interface. Major pages include Home, Sports, Players, Create Match, Match Details, Leaderboard, Tournaments, About, Contact, Login, and Signup. It also uses player imagery, tournament posters, ranking cards, coaching content, and performance statistics.

2. INTRODUCTION

Sports communities need convenient ways to find players, organize games, participate in tournaments, and recognize high-performing members. PlayConnect addresses this requirement through a centralized website combining player discovery, match organization, tournament information, and performance recognition.

The project was developed primarily as a front-end web application using HTML for structure, CSS for design and responsiveness, and JavaScript for client-side interactions. Font Awesome icons and Google Fonts improve the visual presentation.

3. PROBLEM STATEMENT

- Players may find it difficult to discover suitable sports partners or local sporting activities.
- Match organization can require communication across multiple platforms.
- Tournament information may be distributed across different sources.
- Players need a simple way to view rankings, achievements, and performance.
- A sports community website should be responsive and easy to navigate.

4. OBJECTIVES

- Develop a professional sports community website.
- Provide organized player and sports information.
- Provide interfaces for creating and viewing matches.
- Present tournament categories and championship information.
- Display leaderboard rankings, statistics, achievements, and champions.
- Create responsive layouts for desktop, tablet, and mobile screens.

5. SCOPE OF THE PROJECT

- Sports discovery and information.
- Player profile and player listing interfaces.
- Match creation and match detail interfaces.
- Tournament browsing and championship presentation.
- Leaderboard and player performance tracking.
- Community, coaching, and team information.
- Login and Signup user interfaces.
- Future integration with backend database and real-time services.

6. EXISTING SYSTEM

In a conventional sports community setup, players may rely on messaging applications, social media groups, personal contacts, or separate tournament websites. Information about players, matches, tournaments, and rankings can therefore be distributed across different places.

7. PROPOSED SYSTEM

PlayConnect brings these activities into one organized website. Users can navigate from sports discovery to player discovery, create or view matches, explore tournaments, and check leaderboard performance from a common interface.

8. KEY FEATURES

- **Home:** Introduction to PlayConnect and major platform activities.
- **Sports:** Exploration of available sports and sporting activities.
- **Players:** Player discovery and profile-oriented presentation.
- **Create Match:** Interface for organizing a new sports match.
- **Match Details:** Structured presentation of match information.
- **Leaderboard:** Rankings, statistics, monthly champions, Hall of Fame, and achievements.
- **Tournaments:** Cricket Cup, Football, Badminton Championship, and Basketball.
- **About & Contact:** Platform information and communication interface.
- **Login & Signup:** User account interfaces.

9. MODULE DESCRIPTION

9.1 Home Module

The Home page acts as the main entry point and introduces users to PlayConnect. It provides navigation to major platform features and highlights the sports community concept.

9.2 Sports Module

The Sports module presents sports activities in an organized visual format and can be expanded with individual sport pages, rules, player discovery, and match options.

9.3 Players Module

The Players module provides player-oriented content. The project includes player images and profile-style cards to make the interface engaging and easy to understand.

9.4 Create Match Module

The Create Match interface is intended to help users organize sports matches by entering relevant information such as sport, players, date, time, and location.

9.5 Match Details Module

The Match Details page presents selected match information in a structured format.

9.6 Leaderboard Module

The Leaderboard contains a Top 3 podium, filters, search, global player rankings, pagination, statistics, monthly champions, Hall of Fame, recent achievements, top player performance, and a call-to-action section.

9.7 Tournament Module

The Tournament module presents major competitions such as Cricket Cup, Football, Badminton Championship, and Basketball using sports-themed visuals and cards.

9.8 Team & Coaching Module

The project includes a team presentation featuring Founder/CEO, Operations Manager, Lead Developer, and Community Support roles. Coaching content includes Cricket Coach Rohit Sharma, Badminton Coach Anjali Patel, and Football Coach Karan Mehta.

10. TECHNOLOGY USED

Technology	Purpose
HTML5	Page structure, sections, navigation, forms and content.
CSS3	Layout, colors, cards, responsiveness, animations and visual styling.
JavaScript	Client-side interaction, search/filter behavior, storage and leaderboard interactions.
Font Awesome	Sports, navigation, social and interface icons.
Google Fonts	Poppins typography for a modern visual style.

11. SYSTEM REQUIREMENTS

Hardware: a computer or laptop capable of running a modern browser. Software: Windows/Linux/macOS, a modern browser such as Chrome, Edge or Firefox, and a code editor such as Visual Studio Code.

12. WEBSITE ARCHITECTURE

The website follows a page-based front-end architecture. HTML pages provide semantic content and navigation. Shared styling is handled through global CSS and page-specific CSS. JavaScript files are separated by responsibility, allowing application behavior, search, filtering, storage, and leaderboard interactions to be maintained independently.

13. PROJECT FOLDER STRUCTURE

```
PlayConnect/  
■■■ index.html  
■■■ sports.html  
■■■ players.html  
■■■ create-match.html  
■■■ match-details.html  
■■■ leaderboard.html  
■■■ tournaments.html  
■■■ about.html  
■■■ contact.html  
■■■ login.html / signup.html  
■■■ css/ global.css, leaderboard.css  
■■■ js/ app.js, search.js, filter.js, storage.js, leaderboard.js  
■■■ images/
```

14. LEADERBOARD DESIGN

The leaderboard page is designed as a complete player-recognition dashboard. The Top 3 section highlights Riya Kapoor, Priya Shah, and Aman Verma. The ranking table lists players with rank, player name, sport, rating, wins, matches, points, and badge.

Additional sections include platform statistics, Champions of the Month, Hall of Fame, Recent Achievements, and Top Player Performance. Filters for sport, time period, and city are included, along with a player search interface.

15. TOURNAMENT DESIGN

- **Cricket Cup:** Cricket championship visual and tournament presentation.
- **Football:** Football competition presentation.
- **Badminton Championship:** Badminton championship visual.
- **Basketball:** Basketball tournament presentation.

16. USER INTERFACE DESIGN

- Modern blue-and-white visual language with sports-inspired accents.
- Rounded cards and buttons for a contemporary interface.
- Clear navigation header and footer.
- Responsive grids for cards and statistics.
- Hover transitions and visual feedback.
- Mobile layouts using CSS media queries.

17. PROJECT VISUALS

The project uses custom sports imagery for player cards, tournament posters, team presentation, coaching sections, and other visual content. A prepared team-lineup visual is included below.

Figure 1: PlayConnect team-lineup promotional visual.

18. TESTING

The website should be tested page by page to verify navigation, images, forms, responsive layouts, buttons, search/filter behavior, and visual consistency.

Test Area	Expected Result	Status
Navigation	Main links open intended pages.	Passed
Images	Player and sports images load correctly.	Passed
Responsive layout	Cards and sections adapt to screen width.	Passed
Leaderboard	Ranking sections display in an organized layout.	Passed
Search / Filter	Controls respond according to implemented JavaScript.	Passed

19. ADVANTAGES

- Centralized sports community interface.
- Easy navigation between sports, players, matches, and tournaments.
- Strong visual presentation for sports content.
- Leaderboard encourages competition and recognition.
- Responsive design supports multiple screen sizes.
- Modular structure makes future development easier.

20. LIMITATIONS

- The current project is primarily front-end focused.
- A production backend/database would be required for persistent multi-user data.
- Authentication and match management can be further connected to secure server-side services.
- Real-time notifications and live tournament updates are future enhancements.

21. FUTURE ENHANCEMENTS

- Backend integration with Node.js/Express or another server framework.
- Database integration for users, players, matches, and tournaments.
- Real-time match and tournament notifications.
- Player profiles with statistics and history.
- Location-based player discovery.
- Online tournament registration.
- Admin dashboard for managing users, matches, sports, and tournaments.
- Progressive Web App/mobile application support.

22. CONCLUSION

PlayConnect successfully demonstrates the design of a modern sports community and tournament platform. The project combines sports discovery, player presentation, match organization, tournament information, leaderboard rankings, achievements, and community-oriented content in one cohesive interface. Through this project, practical skills in HTML, CSS, JavaScript, responsive design, UI organization, and front-end project structure were applied.

23. REFERENCES

- HTML5 and CSS3 concepts used for web page structure and styling.
- JavaScript concepts for client-side interaction.
- Font Awesome icon library for interface icons.
- Google Fonts – Poppins for typography.
- Project source files and assets created during PlayConnect development.
